## 1 Inconsistencies of AI

The girl with the green hand is a bit weird, its a bit uncanny cause the light is a bit weird the glass behind looks quite weird as well. His legs are not proportional.

The chessboard has too many pieces. The lamps look a bit weird, the chair's hand rests are not at all like how they are supposed to look.

The finger behind the book looks a bit weird it does not support the book as well

as the curvature of it

The girls limbs seem to be extremely static like she was posing instead of moving, but her hair and hand indicate movement, also her right hand looks quite weird.

The highlight on the left arm should not exist cause its behind his back so it should be fully in shadow the same goes for his era, also his veins look non human on his left arm.
